

Associate Relay Engineer
Relay & Power Systems
Conshohocken, PA

Company Overview:

Relay & Power Systems (RPS) has an experienced core of engineers, designers, panel builders and technicians. RPS specializes in manufacturing auxiliary relays; custom relay, instrument and control panels; and provides technical services and turnkey solutions to utility and industrial customers. RPS is a subsidiary of Rumsey Electric Company – a dynamic, employee-owned electrical distribution company serving Eastern PA, NJ, DE and MD. In existence for over 100 years, Rumsey provides a competitive salary and benefits package, along with diverse opportunities for long term career development. The Rumsey team consists of over 250 employee owners that thrive in a fast-paced customer service environment. Rumsey just may be the company you've been looking for!

Benefits:

- Flexible work hours
- Stock ownership
- 401(k) with employer matching
- Medical/Dental/Vision/Prescription
- Life and Disability Insurance
- Flexible Spending Accounts

Position Overview:

We have an opening for an Associate Relay Engineer reporting to the Engineering Manager based out of our Conshohocken location. This individual will be responsible for designing electrical protective relay schemes and relay/control panels for various utility and industrial applications. This is an entry level, developmental position; individual is required to attend, participate and report on all formal and informal training assignments. Individual will work under the general supervision of a senior Relay Engineer or Group Leader or manager.

Essential Functions:

The essential functions are the tasks, duties and responsibilities that are critical to the job; the employee must be able to perform the essential functions with or without reasonable accommodation.

- Create design-basis drawings (relay single lines, schematics, logic diagrams, physical layouts, etc.) from customer specifications with supervision and oversight from senior personnel.
- Develop the Bill of Material for projects.
- Estimate and bid projects. This will involve site walk downs and visits to customer's locations.
- Participate on project teams as a support Engineer.
- Support the design, settings and functionality development of protective relays and relay/control panels.

- Support testing all aspects of protective relay and control schemes/panels in the production facility, including operation and manipulation of test equipment, and, if required, at the customer site.

Required Knowledge, Skills & Experience:

- Bachelor's Degree in Electrical Engineering (preferably in Power or Protection/Controls).
- Proficient with Microsoft Office products (e.g. Word, Excel, etc.).
- Strong oral and written communication skills.
- Ability to work in a team-oriented, collaborative environment.
- Detail oriented.
- Valid driver's license.

Desired Knowledge, Skills & Experience:

- Master's Degree in Electrical Engineering (preferably in Power or Protection/Controls).
- Completion or progress towards the completion of *Engineer in Training* requirements.
- AutoCAD and/or Micro-Station CAD experience.
- Electrical field engineering experience in an industrial or utility environment.
- Engineering experience in substation design or protective relaying.

If you meet the criteria outlined above, we encourage you to apply. To apply online, [Click Here](#) to complete our employment application.

Rumsey Electric Company is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to age, race, color, religion, sex, national origin, sexual orientation, gender identity, disability, protected veteran status, or any other legally recognized status entitled to protection under the applicable federal, state, or local laws.
