NEWS

Your Voice Matters
Last year you shared feedback. We listened.

Simplify startup for low voltage drives.		We completed 2 quick start manuals and 7 YouTube videos to provide support for basic installation and wiring of low voltage drives.
Notify me about product updates.		We developed a product notification feature for the Product Compatibility Download Center (PCDC) that allows you to sign up for product notifications on a weekly, quarterly, or monthly basis.
Provide easy access to product lifecycle and migration information.		We implemented an intuitive product lifecycle view across our website so you can easily access all the information you need for migration and upgrade information.
Let us input my bill of material into the Rockwell Automation website for easy access to compatibility, downloads and product lifecycle information.		We designed an import tool for the Product Compatibility Download Center (PCDC) that allows you to bring in a list of products from Excel or Facebook.
Resolve my issues faster.		Through faster internal communication and response, we are now resolving the most complex technical issues 25% faster.
Make it easier to find product information on your website.		We reworked the website to make it easier for you to find frequently used information like the product drawing tool, downloads and documentation. And, we made the tools easier to use so you can find what you need faster.

THE TIME HAS ARRIVED!
The new Rockwell Automation website is now live. It's the most user-friendly, easiest to use, and most powerful website we've ever seen. It's the best product website we've ever seen. It's the best product website we've ever seen.

Thanks for your feedback!

Rumsey Day of Power was a Huuuge Success!
Our Drives Headquarters training on January 31 and February 1 was a huge success. Rumsey welcomed 38 customers over the two-day training that featured hands on labs, product demonstrations and a PowerFlex 525 to take home. [More.](#)

AUTOMATION

FEATURED

Armor CompactLogix 5370 & Armor Compact GuardLogix 5370 Controllers Launch Kit

On-Machine™ standard and safety control moves to the small control space. The Armor™ CompactLogix™ and Armor™ Compact GuardLogix® controllers deliver standard, safety and motion control for On-Machine™

applications. Customers can obtain SIL 3, PL(e), CAT 4 safety control in the Armor Compact GuardLogix version and standard control in the Armor CompactLogix version, both with the flexibility and scalability of being installed directly on the machine and both help with protection against dust and water ingress in harsher environments. [More.](#)

LIGHTING

IN STOCK

Lithonia Lighting IBH LED High Bay

Lightweight aluminum heat sink designed to perform at warm ambient temperatures. Due to precision thermal engineering for maximum naturally convective cooling this fixture provides lumen drop that is less than fluorescent. Fabricated steel channel provides maximum rigidity. [More.](#)

POWER TRANSMISSION

FEATURED

Apache 2-Ply 65# Polyester Monofilament White Urethane Cover x Bare

Support for Minority Engineers Reflects Company Priorities and Values

In this blog post, Candace Barnes, Diversity Recruitment Programs Consultant at Rockwell Automation, shares some advice to companies on how to create a corporate culture that promotes diversity. She also share some career advice for young professionals. [Full Post.](#)

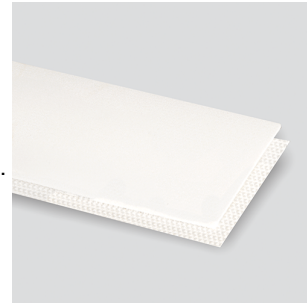

Demand-Based Manufacturing: Harmonize Real-Time Production Data

Manufacturing requires dozens of handoffs, as goods and materials move through suppliers, inbound transportation, receiving, production, packaging, shipping, outbound transportation, and then to customers. Any problem — a quality reject, a missing component — sends ripples of delay across the supply chain, jeopardizing delivery and customer satisfaction. [There's a better way.](#)

Modernization Solutions for Today & Tomorrow

The preferred belting style in most applications in today's food industries, including candy & confectionery, baking, fruit & vegetables, pickles, canning, and meat & poultry processing. The lightweight, low friction bottom make these among the most efficient belts on the market. They are also commonly used in industrial applications when a non-marking or a light colored, abrasion resistant belt is required. [Specifications.](#)

Tsubaki KabelleSchlepp Cable & Hose Management Solution

From light-weight micro-sized mono cable carriers on up to super-large-super-duty steel chain designs. [Brochure.](#)

DATACOM

IN STOCK

Now in Stock: Industrial Ethernet Patch Cables

Rumsey now has a full inventory of Industrial Ethernet Patch cables. Select from shielded/unshielded. Category 5e/6, special industrial jackets, 600V AWM Ratings, high-flex rating, many various lengths, and [more.](#)

Hoffman / Pentair DataCom Cabinets and Wall Mount Solutions

Now in stock at Rumsey and available for next day delivery – this includes 19" wall mount racks, pivoting racks, and double-hinged data cabinets. [More.](#)

VERSARACK™

New Product Launch – BAT867 Wireless Access Point & Client

The Hirschmann BAT-867 Next Generation Wireless Access Point and Client provides a slim, cost effective, wireless option for bringing Wifi to a panel without sacrificing the latest in technology or security. [More.](#)

SUPPLIES

IN STOCK

May 4

8:30am - 4pm

This one-day event will focus on modernizing your automation systems by discussing the benefits of newer technologies, while helping to document your current exposure. In many cases, simple migrations do not fully leverage the advanced functions and capabilities of these new products, leaving productivity gains behind. Join us to learn best practices and upgrade strategies to maximize and strengthen your next-gen plant. [More](#).

Hubbell HBL29W76 Watertight Devices

Features:

- Smooth body design minimizes collection points simplifying the wash down process
- Strain relief nut always seals on the body, minimizing debris collection
- Stainless steel hardware and corrosion-resistant connection points [Spec Sheet](#)
