Welcome to Rumsey Electric's Safety Circuit, a newsbrief containing information on safety-related trends and products.

NEWS YOU CAN USE

Rockwell Automation Struggling with Machine Safety Skills Gap?

We can help – with the support of our TÜV Rheinland machine safety engineers and safety courses.

TÜV Rheinland certified machine safety training courses can help you to deliver staff training that qualifies them for an industry-standard TÜV Rheinland Certificate, helping them understand safety requirements, compliance and contributing towards a safer working environment.

These intensive safety training courses, delivered in partnership with, and certified by TÜV Rheinland, are designed to educate and inform participants of current best practice within functional safety. Courses available include:

- Functional Safety for Machinery (Technical Certification)
- Functional Safety for Machinery Intro (Engineer Level)
- Functional Safety for Machinery (Engineer Certification)

BEST PRACTICES

Preventing More Deaths During a National Heat Wave

With more than 110 million Americans exposed to excessive temperatures this week – heat indexes are expected to be above 90 degrees in almost all 48 continental states – the Occupational Safety and Health Administration urges employers to protect workers who may be exposed to extreme heat while working outdoors or in hot indoor environments. It can be a matter of life and death. [Full Article.](#)

RESOURCES

For a limited time, Rumsey is offering FREE thermal audits of your enclosures

Rumsey will schedule a thermal audit for all critical enclosures and create a cooling solutions package if needed. Hoffman provides a variety of enclosure heating and cooling system solutions tailored to your application, available where and when you want them. Every unit is tested for
