Welcome to Rumsey Electric's Safety Circuit, a newsbrief containing information on safety-related trends and products.

NEWS YOU CAN USE

OSHA cites Idaho potato processor for major safety and health violations

BOISE - The U.S. Department of Labor's Occupational Safety and Health Administration found an Idaho frozen food manufacturer, Dickinson Frozen Foods, failed to safeguard employees and was unprepared to respond to a potentially lethal release of 1,300 lbs. of anhydrous ammonia on Dec. 1, 2015. The Intelligent Use of Big Data for an Intelligent Safety Program

The world of safety is not lacking in data; in fact, it's drowning in it. We need smart data systems that allow us to apply our expertise in the most efficient way possible to keep workers safe.

[HKLDPK2](#)

- (b) Don't really need to be inspected because the manufacturer warranty is enough
- (c) Shall be inspected for damage once a week and maybe after any incident
- (d) Shall be inspected for damage before each day's use and immediately following any

incident that can reasonably be suspected of having caused damage.

(e) Insulating gloves shall be given an air test, along with the inspection. Shall be subjected to periodic electrical tests.

BEST PRACTICES

Don't leave your systems vulnerable, incorporate simple physical security to ship with every system using Panduit block-out and lock-in USB and RJ45 fillers.

- Now in stock– starting at just \$27/bag
- Prevent unauthorized access to physical assets
- Straightforward method to ensure unwanted casual access to unused ports
- Decrease incidents of accidental/unintended removal or usage. [More.](#)

RESOURCES

Creating a Culture of Safety through Contractor Management

Take a proactive approach to managing the relationships with third-party contractors, suppliers and vendors in this free on-demand webinar. You will also learn:

- How to foster a culture of safety by prequalifying and managing contractors and suppliers.
- How involving executive leadership is key to a widespread adoption of contractor management.
- How to achieve high levels of compliance throughout your contractors and suppliers.
- How to maintain positive relationships with contractors while having a high level of scrutiny for safety and performance indicators. [More.](#)
