This instructor-led training will review why the Stratix 2500 is the perfect match for Machine Builders interested in maximum features at optimum cost. We will review the needs of switches today, what differentiates a “lightly” managed switch, and include a hands-on training to review all the functionality.

Topics covered at a minimum:

- Out of box capabilities of the Stratix 2500
- The Effect of Multicast Traffic Control (IGMP Snooping/IGMP Querier)
- Express Setup – Configuring Beyond the Defaults
- Smart Port Roles – What They Are, Why and How They Are Applied
- VLANs and Spanning Tree – Protecting Your Machine During Startup
- Add-On Profiles – Integration of the Stratix 2500 into Logix 5000

Each student will receive one 5-port Stratix 2500 Lightly Managed Switch (list price \$450) to configure and use during the class and to keep afterwards.
